

# Ultimate Terrain Europe Patch For Aerosoft's New Spanish Airports (and standalone airport packages making up New Spanish Airports)

## Overview

Aerosoft's (& Simwings) New Spanish Airports product is actually a combination of previously released standalone products.

Because these Aerosoft/Simwings products are also available as standalone products, there is no specific UT Europe patch for the whole New Spanish Airports product. Instead, you will download and apply the patches for the individual products that make up New Spanish Airports.

The patches will mostly fix water and coastline conflicts between UT Europe and each 3<sup>rd</sup> party scenery product in question.

The airport sceneries below often contain detailed 3D road objects. These were probably positioned using the base FS2004 road data. As a result, the objects and/or roads will not line up with the accurate UT Europe roads. However, these differences are usually difficult to see without looking closely.

The following Aerosoft/Simwings scenery areas do not need patches or special instructions:

- Jerez de la Frontera

The following scenery areas have patches and/or special instructions available for download. Click on each scenery area to download the patch for it:

- [Alicante Patch](#)
- [Almeria Patch](#)
- [Barcelona Patch](#)
- [Malaga Patch](#)
- [Madrid-Barajas Patch](#)
- [Pamplona-Santander Patch](#)
- [Valencia Patch](#)
