

Ultimate Terrain Europe With Aerosoft's Spanish Airports 2 (and also SimWings Sevilla, Gerona, Granada, Reus)

Aerosoft's "Spanish Airports 2" package contains the airport regions of Sevilla, Gerona, Granada and Reus. These airports are also available as individual packages from SimWings.

At this time, a patch is not necessary for using these products with UT Europe.

Some of the airports contain detailed road objects that are positioned to work with the base roads in FS2004. So, the road objects will not align correctly with the UT Europe roads.

Other than the road alignment, you should have no compatibility issues.
