

UTX USA Version 1.6 Release Notes

Version 1.6 Feature Enhancements

Bug Fixes And Specific Enhancements

- 15 FSX airports were corrected and/or moved to their real world locations
- Please be aware that adding new features (i.e runways and taxiways) to FSX airports is out of scope for this product line. Our main focus is to correct FSX airports that are misplaced enough to cause problems with the more accurate UTX road and water features.
- Other enhancements were corrected as specified in the "Patch Notes" below.

If you have reported an issue and would like to read the developer notes, please see the link below:
